

WORKING GROUP TISSUE

OBJECTIVES

The mandate of the group is to analyse the actual practices and evaluate the gap with existing international and European guidelines. The overall mission is to improve sample quality, harmonize practices and propose solutions to support interoperability among biobanks. A data set has been established and actions are actually being undertaken within the Institutes to implement documentation related to the defined data set.

As the project PATHOLINK funded by the SNSF (Biolink call) have globally similar objectives, this group and PATHOLINK fused for the period of the project. PATHOLINK will implement a standardized pathology report (for 4 tumor entities) and create a integration layer where samples and its associated data together with data from standardized pathological report can be searchable through the 5 pathology Institutes via an e-catalogue.

LIST OF MEMBERS

Expert = Swiss society of pathology

- › Luigi Terraciano – Basel
- › Aurel Perren – BE
- › Laurence De Leval – CHUV
- › Laura Rubbia-Brandt – HUG
- › Holger Moch – ZH
- › Wolfram Jochum – SG

Operational managers

- › Serenella Eppenberger – Basel
- › Tilman Rau – BE
- › Inti Zlobec – BE
- › Nathalie Piazzon – CHUV
- › Thomas McKee – HUG
- › Peter Schraml – ZH
- › Wolfram Jochum – SG

FORMAT

Meeting 2-3x/year, Telco 2x/year and consultation by e-mails whenever necessary.

CONTACT

Lead

Aurel Perren
Director of the Institute of Pathology,
Bern
aurel.perren@pathology.unibe.ch
Phone: +41 31 632 32 23

Replace by Holger Moch
Director of the Institute of Pathology,
Zürich during the sabbatical of the
leader (2017-10 to 2018-04)

Coordination

Laurence Chapatte
SBP coordination manager

laurence.chapatte@swissbiobanking.ch
Phone: +41 21 314 71 29
Mobile +41 79 556 77 90
